*TRADITIONNELLE  
CHRONOGRAPH PERPETUAL CALENDAR*

*A fresh interpretation of a legendary timepiece certified with the Hallmark of Geneva*

*The Manufacture is revisiting one of its most iconic models: the Traditionnelle chronograph perpetual calendar. Equipped with the new Manufacture Vacheron Constantin Caliber 1142 QP, this timepiece perpetuates the tradition of excellence cultivated by the finest Geneva watchmakers.*

With this new creation appearing in a 950 platinum and 18K 5N pink gold versions, Vacheron Constantin has opted to combine two key Fine Watchmaking complications: the chronograph and the perpetual calendar.

*Technique meets elegance*

With its classic round case, the Traditionnelle collection by Vacheron Constantin embodies the values cherished by the Maison, combining tradition and formal elegance with supreme mastery of horological complications. The new Traditionnelle chronograph perpetual calendar is the ultimate expression of this successful synergy. The collection's distinctive design codes are reflected in each and every detail: the stepped case with a distinctive fluted pattern on the back, the dauphine-style hands and the railway-type minute track. A white or black tachymeter scale surrounding the dial accentuates the technical nature of the watch.

*Limpid display*

Exemplifying a concern for legibility, the dial features various shades of grey with finishes that differ according to the functions, reflecting the layout of 1940s Vacheron Constantin chronographs. Standing out against a slate- or silvered-coloured opaline base, the small seconds and chronograph minutes counters are distinguished by a circular-brushed ring with snailed centre. The 22K white gold or pink gold moon disc is hand-finished in keeping with the fine tradition of artistic crafts cultivated by Vacheron Constantin. Positioned in the centre of the date counter, it provides a symbolic depiction of a moon face that is alternately smiling or melancholy, depending on the path of the Earth's satellite. A subtle nod to historical pocket watches.

*Subtle evolution*

This sophisticated aesthetic approach is matched by the technical evolution embodied in the movement of the Traditionnelle chronograph perpetual calendar. Caliber 1142 QP, a state-of-the-art movement entirely designed and developed within the Manufacture, replaces the 1141 QP. The new movement drives the perpetual calendar functions – with indications of the days, date, months, leap years and moon phases – as well as the chronograph functions with a direct-drive seconds hands and 30-minute counter at 3 o'clock, positioned opposite the small seconds at 9 o'clock. This newcomer to the Traditionnelle collection will thus be able to keep track of all the vagaries of the calendar without any need for adjustments until March 1<sup>st</sup> 2100.

GENÈVE, DEPUIS 1755

*High standards certified by the Hallmark of Geneva*

With the development of this new caliber, the Vacheron Constantin watchmakers and developers have been keenly attentive to the energy constraints relating to the chronograph functions, in order to minimise their impact on the 48-hour power reserve. The oscillation frequency of the balance has also been raised from 2.5Hz to 3 Hz (21,600 vibrations/hour) so as to increase reliability and shock resistance. Like all Vacheron Constantin movements, this new caliber visible through an elegant transparent sapphire crystal caseback was developed and designed to meet the stringent Hallmark of Geneva criteria. This emblem of Geneva's watchmaking excellence applies both to the caliber itself and to the finishing of the watch as a whole, governed by demanding norms that make it one of the most rigorous and renowned watch industry certifications.

The Vacheron Constantin Traditionnelle chronograph perpetual calendar is fitted with a hand-stitched *Mississippiensis* alligator leather strap secured by a 950 platinum or 18K 5N pink gold folding clasp. An authentic marvel on the wrist.
